

Come learn about the NJDEP Division of Fish and Wildlife's Landscape Project, an interactive ecosystem-based mapping tool that assists government agencies, planners, conservation groups, the public and others in making decisions that will protect wildlife.

A Landscape Project training and information session will be hosted by:

**Rutgers University, Cook Campus
Center for Remote Sensing and Spatial Analysis (CRSSA)
New Brunswick, NJ,
Tuesday, December 3, 9:30 a.m. - 12:30 p.m.**

The training and information session will cover the updates and enhancements to the project and participants will have an opportunity to use GIS "hands-on" to access habitat maps for threatened and endangered wildlife species. Registration is required and seating is limited so please register as soon as possible.

To register, please e-mail: patrick.woerner@dep.state.nj.us .

For additional information regarding the session visit:
