

New Jersey Geospatial Forum

Executive Committee Meeting Agenda

Date: June 13, 2017

Time: 1:00 pm to 3:00 pm

Location: Riverview Plaza 200, Room 402

Old Business:

- Previous Executive and General meeting Minutes - review and approve. Minutes from March 16, 2017
- Need the minutes to be posted for the following dates: December 2, 2016, October 17, 2016, September 16, 2016 and June 9, 2016.
- Need the Minutes to be posted for the following General Meeting Dates: December 2, 2016, October 17, 2016, and June 9, 2016.

Constituency Group Updates:

- State GIO/Office of GIS
- County
- Education
- Federal
- Land Surveyors
- Municipal Government – Vacant (Rich Caprio-sitting in)
- Non-government Organizations (NGOs)
- Private Sector
- Regional
- State

Task Force Updates:

- Boundary
- Elevation
- Trails
- Zoning

New Business:

- Elections
 - Land Surveyor
 - Federal Government
 - Non-government Organization
 - Regional Authority
- Recent issues with conduct/posting on the listserv
Limiting posting of content through the NJGF discuss listserv to the general membership via executive committee members posting only.

Anyone that would like to submit content to the NJGF community should submit their content to their executive committee member liaison (County, State, NGO, Private, etc.)

The executive committee member will use their discretion to determine whether or not the content is appropriate for the entire group. The latest WMS question/issue should have been directed towards the steward of the data (NJOGIS) not the NJGF community

- Presenters for September:

GIS As a Service Learning Course

- Peggy Minnis, Chemistry & Physical Sciences Department, Pace University, Pleasantville NY

Pace University requires each student to complete a service learning course. Over the years, GIS has served as such a course, sending students into communities and organizations to determine how GIS can help provide information and maps for making decisions. Along the way, students learn the complexity and difficulty in dealing with volunteer or community organizations and in getting accurate or useful information. Several class projects will be used as examples. Projects that were undertaken and abandoned will be reviewed, with possible reasons why they could not be completed by an undergraduate class.

Research Projects at CRSSA

Rick Lathrop, Professor

David Tulloch, Associate Professor

Rutgers' Grant F. Walton Center for Remote Sensing and Spatial Analysis (CRSSA) has been a geospatial leader in New Jersey and beyond since 1982. The Center has taught generations of students GIS and remote sensing as the home to the Environmental Geomatics program. Today, CRSSA leverages its expertise and technology for research ranging from ecological analyses to studies of childhood obesity to creation of an ocean data portal.

- Presenters for December:

Historic maps/aerials on the feature service

Doug. Schleifer, Manager NJOIT, OGIS

New Jersey Historic Preservation Office GIS initiatives and Data

Kinney Clark and Others
