

The NJ Office of GIS will be retiring a REST endpoint on Thursday, May 25th 2017.

Retiring:

<http://njgin.state.nj.us/arcgis/rest/services>

Replacement:

<http://geodata.state.nj.us/arcgis/rest/services>

Instructions

Change the source from <http://njgin.state.nj.us> to <http://geodata.state.nj.us>

Important

No crosswalk is required as both endpoints point to the same underlying servers.

For instance, if you have been using this basemap

http://njgin.state.nj.us/arcgis/rest/services/Basemap/Roads_NJ/MapServer

You will find the same one at the geodata endpoint:

http://geodata.state.nj.us/arcgis/rest/services/Basemap/Roads_NJ/MapServer

Please email us at njgin@oit.nj.gov with any questions.
