

## **State, Local and Nonprofit Open Space of New Jersey data set replaces Open Space and Preservation Resources Inventory**

The NJDEP Green Acres Program State, Local and Nonprofit Open Space of New Jersey data set replaces the NJ Office of GIS Open Space and Preservation Resources Inventory (OSPRI) in PAD-US schema for New Jersey, 2017-10, NAD83 NJ State Plane feet. The Green Acres data set represents a significant update from OSPRI and will continue to be updated on a quarterly basis. It is accessible through the NJ Office of GIS Open Data site at <https://njogis-newjersey.opendata.arcgis.com/>. Although the schema for the Green Acres data set varies from OSPRI, it does contain similar attribute information.

The USGS Gap Analysis Program will continue to maintain PAD-US (Protected Areas Database of the US) data for New Jersey, derived annually from the Green Acres data. Federal open space lands are also included. PAD-US data can be downloaded at <https://gapanalysis.usgs.gov/padus/data/download/>.
